Math

We will continue to build on our knowledge of the numbers 1-10. In addition to numbers we will be working on the following:

- Identify objects in groups as being greater than, less than, or equal
- Identify and describe 2D shapes around us
- Create and build patterns (AB, ABB, etc.)

Social Studies/Science

- Living & Nonliving Plants/Animals and their impact on our environment
- Farming
- Halloween

Teacher Tips

Like the leaves outside, the weather is quickly changing! Please take note of this change and be sure that your child comes to school with the proper clothes that will keep him/her warm when they go out for recess! Please remember to have them labeled with your child's name on the tag.

I hope you and your kindergartner found the activity calendar for September fun but also a learning experience. These are an authentic way of hitting on some really great skills and still having some fun with it!

Language Arts

Letters

We are on track to be finished learning our letter sounds by the end of the month! We have started using these sounds to build words when we write especially that first sound they hear. I am really starting to encourage the kids to sound out their words and write down what they hear.

Sight Words

Please keep practicing your words at home each night along with reading to your child!

Reading & writing Objectives

- Continue to identify rhyming words
- Continue to determine number of syllables in a word
- Beginning sounds/Ending sounds
- Retell Stories

Reminders

- Tuesday, Oct. 3 Culver's Benefit Night
- Thursday, Oct. 5: Coyote Crawl, 12:10 dismissal time
